

SCI/NHBC Certification

Frameclad Ltd

Light Steel Frame System

SCI / NHBC Stage 1 System Certification

The Steel Construction Institute has assessed the structural aspects of the Frameclad System for Stage 1 – System Certification and confirms that it is suitable for use in the construction of dwellings in accordance with NHBC Standards Chapter 6.10 “Light steel framed walls and floors”.

The system has been assessed for residential buildings up to three storeys high. As its basic components the system uses cold rolled galvanized C-sections for wall studs and floor joists.

Structural design is in accordance with BS EN 1993-1-3.
